

URGENT

**TACTICAL
TRAINERS**

The Tekton Bafflers

Formed by an array of overlapping baffles, this rapid response trainer acts as a reflector for social fissures, amplifying their reverberations until feedback occurs and temporarily resetting retrograde thought patterns.

The 16 Psyche Gluttons

The asteroid 16 Psyche is said to have enough gold and platinum to make everyone on earth a billionaire. But why wait in poverty until we reach the asteroid belt to mine it? These shoes send out gold guzzling NanoWhales© on the quantum ocean to gulp down gold ions from 16 Psyche and bring them back to the wearer. In only five years of daily wear, the shoe will become fully encrusted with gold and must then be submitted to a governing body in Luxembourg which redistributes the wealth fairly around the world.

The Veracity Footgoggles

How to function in a world where facts are increasingly harder to discern? The Veracity Footgoggles let the user feel their way through the ambiguity by gently stroking the sole of the foot in the presence of truth and causing a quick muscle cramp for lies.

The Permafrost Warden

This self-heating Arctic-ready shoe sniffs out ancient pathogens which have recently come back to life in the melting permafrost and instantly irradiates them with UV light.

The SadoMoral Binders

The SadoMoral Binders

No wonder why we can't fix anything that's wrong with this world when we are constantly distracted. The Moral Ribs® in the front of the shoe each function as different physically binding moral imperatives. If the wearer strays from the path of any of these imperatives throughout the day, the shoe tightens around the foot making it impossible to move.

THE GLISSANDO TERRAFORMERS

The Glissando Terraformers

The first formal trainers designed to be worn on the surface of Mars. The black photoactive surface absorbs solar energy to harvest algae which is excreted through the yellow glissando soles allowing the wearer to glide on the planet's surface. The algae in turn pumps out oxygen to thicken the planet's atmosphere eventually making it habitable.

The RequiEmpath Stampede 9000s

The RequiEmpath Stampede 9000s

We will not mourn the death of empathy! Together we will joyously stomp our hopeful feet and charge the horizon for the promise of mutual understanding! The purple veins of these mad-hideous™ shoes course with oxytocin which is absorbed into the blood of the viewer instilling a sense of proto-kinship with people you'd usually abhor.

The MantaData Demissioners

The MantaData Demissioners

We all know that data pollution is the number one cause of both global warming and psychological irritability. Now there's a trainer that can drastically reduce all your emissions to just one piece of data per day. The revolutionary MantaData™ sieve filters out all your useless off-gassing, preserving just the most essential kernel of immateriality which you can proudly embrace as your day's work.

THE GRAVITAS AIRSLICKERS

The Grativas Airslickers

There is nothing worse than feeling unseen, unimportant, weightless. The Gluon tongue agitates strong force particles forming Capton micro-filaments around the wearer, imparting you with an undeniable charisma and gravitas.
